NATAS – OverTheWire Wargames Write-Up

Level 0

First, copy this URL:
http://natas0.natas.labs.overthewire.org

Open a new browser tab and paste the URL into the address bar.
When the page loads, you will see a pop-up asking for a **username and password**.

Enter the following credentials:

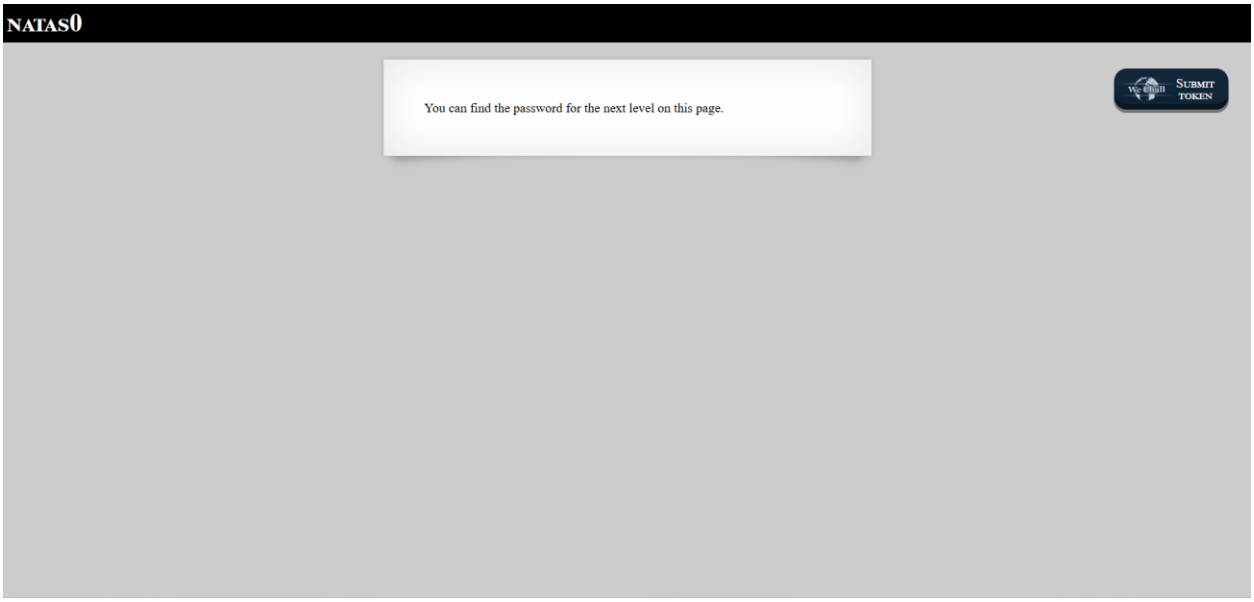
- **Username:** natas0
- **Password:** natas0

Then click **Enter/Login**.

Now, you will see the web page. On this page, there is a message:

"You can find the password for the next level on this page."

So now comes the interesting part — finding the password for the next level.



Step to Find the Password

This step is simple but very important.

- Right-click anywhere on the page

- Click **“View Page Source”**

Inside the source code, you will find the **password for the next level**.

```
Line wrap
<html>
<head>
<!-- This stuff in the header has nothing to do with the level -->
<link rel="stylesheet" type="text/css" href="http://natas.labs.overthewire.org/css/level.css">
<link rel="stylesheet" href="http://natas.labs.overthewire.org/css/jquery-ui.css" />
<link rel="stylesheet" href="http://natas.labs.overthewire.org/css/wechall.css" />
<script src="http://natas.labs.overthewire.org/js/jquery-1.9.1.js"></script>
<script src="http://natas.labs.overthewire.org/js/jquery-ui.js"></script>
<script src=http://natas.labs.overthewire.org/js/wechall-data.js></script><script src="http://natas.labs.overthewire.org/js/wechall.js"></script>
<script>var wechallinfo = { "level": "natas0", "pass": "natas0" };</script></head>
<body>
<h1>natas0</h1>
<div id="content">
You can find the password for the next level on this page.

<!--The password for natas1 is 0nzCigAq7t2iALyvU9xcHlYN4MlkIwlq -->
</div>
</body>
</html>
```

Level 1

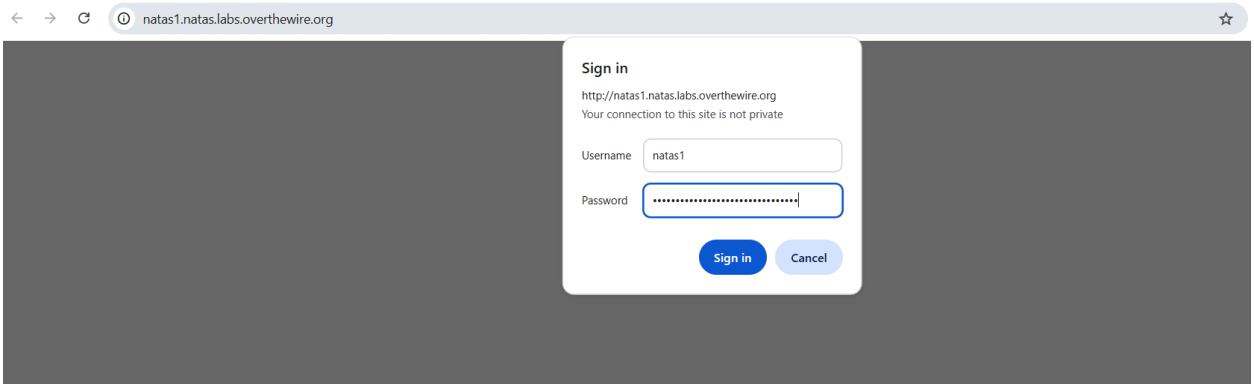
First, go to the Level 1 URL:
http://natas1.natas.labs.overthewire.org

Open it in your browser. You will again see a **pop-up login box** asking for a username and password.

Enter the following:

- **Username:** natas1
- **Password:** *(Use the password you found in Level 0)*

After logging in, the web page will load.

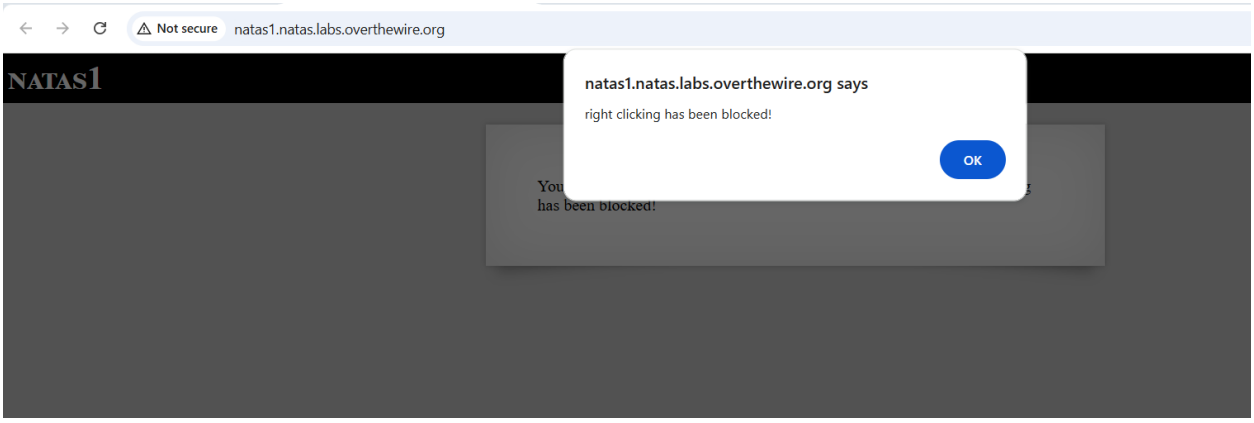


Observation

On the page, you will see the message:

"You can find the password for the next level on this page, but right-clicking has been blocked!"

So now the challenge is clear:
We need to find the password, but **right-click is disabled**.



Solution

This is the most important part of this level.

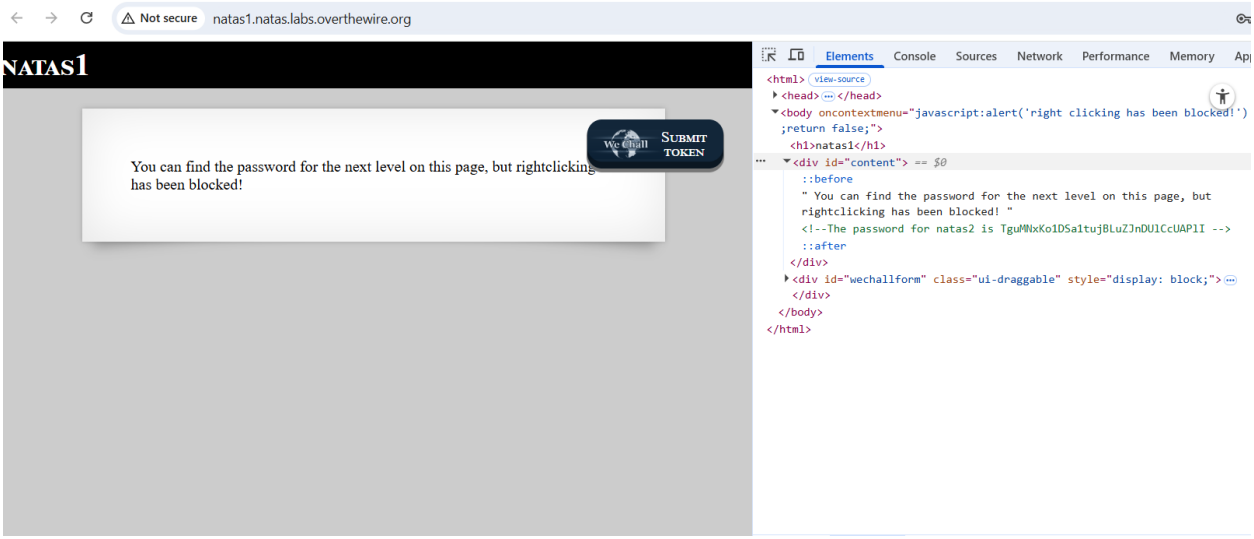
Even though right-click is blocked, we can still access the page source using **Developer Tools**.

Follow these steps:

1. Click the **three dots (⋮)** in the top-right corner of your browser
2. Go to **More Tools → Developer Tools**
3. Open the **Elements** tab

Inside the Elements section, you can inspect the HTML of the page.

There, you will find the **password for the next level**.



Level 2

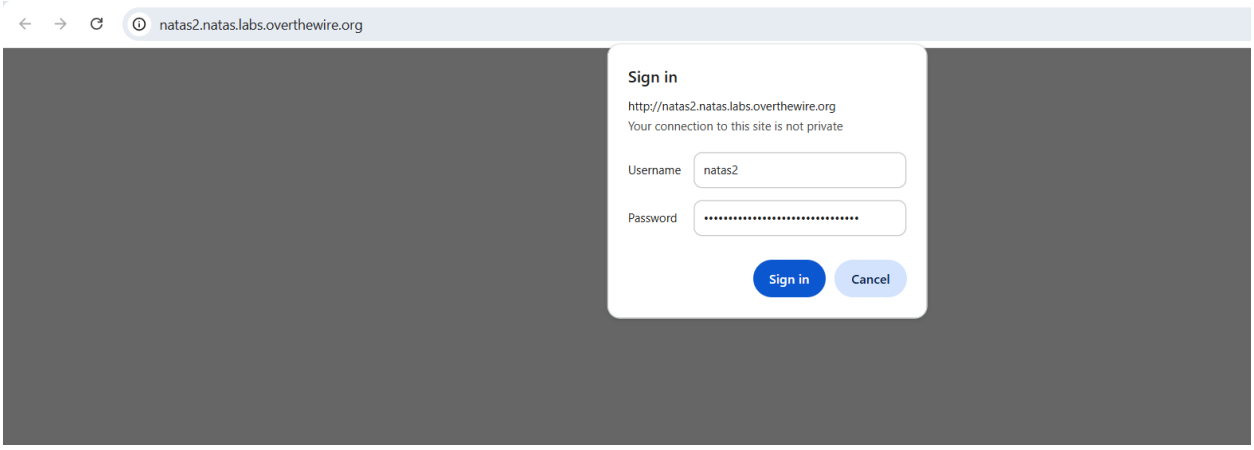
First, go to the Level 2 URL:
http://natas2.natas.labs.overthewire.org

When you open the page, you will see a **login pop-up** asking for a username and password.

Enter the following:

- **Username:** natas2
- **Password:** *(Use the password you found in Level 1)*

After logging in, the web page will load.



Observation

At first, the page looks normal and does not directly show the password.

So now we need to explore further to find hidden files or directories.

Solution

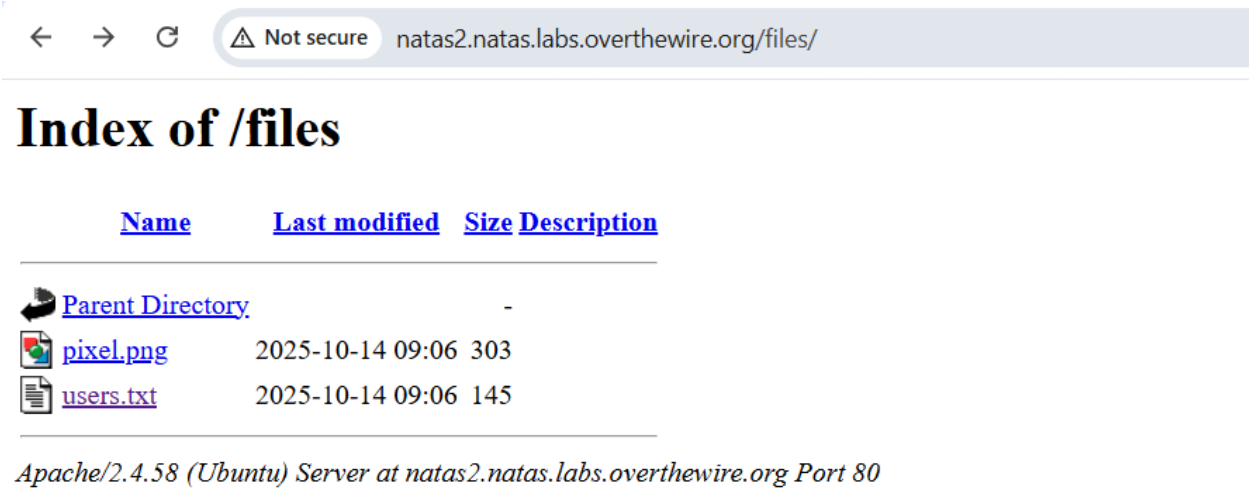
This level is very interesting because the password is stored inside a **hidden directory**.

Follow these steps:

1. In the browser URL bar, manually type:

   http://natas2.natas.labs.overthewire.org/files/

2. Press **Enter**

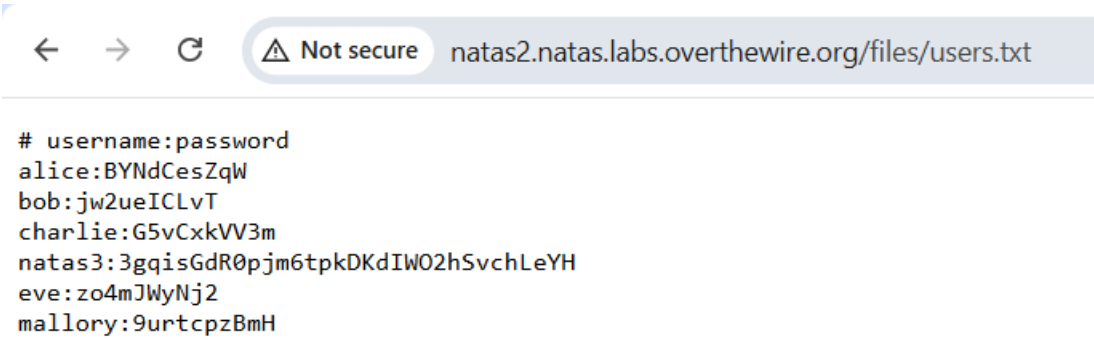


3. Now you will see a directory listing with files inside it
4. Look for a file named:

   user.txt

5. Click on **user.txt**

Inside this file, you will find the **password for the next level**.



Level 3

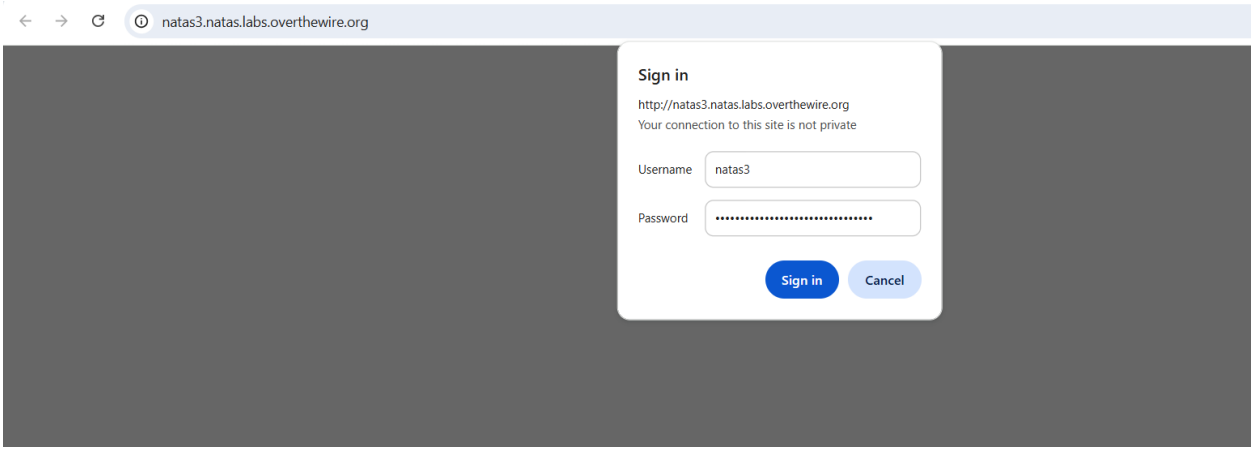
First, go to the Level 3 URL:
http://natas3.natas.labs.overthewire.org

When you open the page, you will see a **login pop-up** asking for a username and password.

Enter the following:

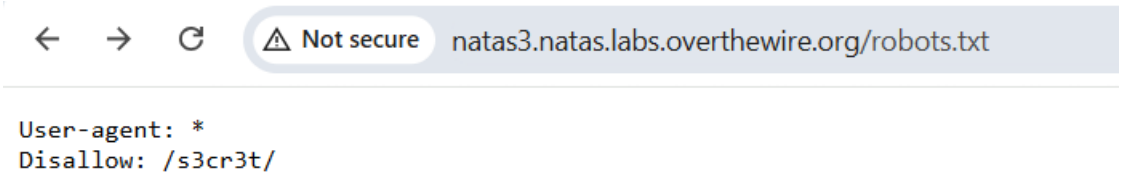
- **Username:** natas3
- **Password:** *(Use the password you found in Level 2)*

After logging in, the web page will load.



Observation

The page does not directly show the password.
So we need to look for hidden information or directories.



```
User-agent: *
Disallow: /s3cr3t/
```

Solution

This level introduces the use of the **robots.txt** file.

Follow these steps:

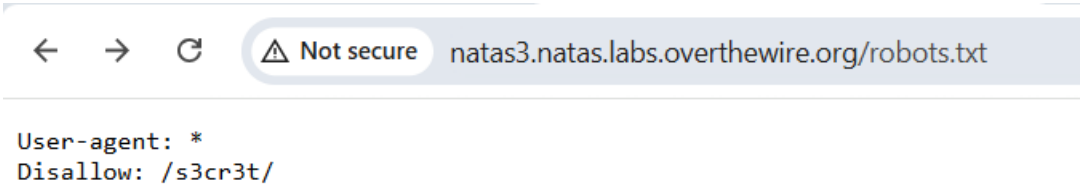
1. In the browser URL, type:

   http://natas3.natas.labs.overthewire.org/robots.txt

2. Press **Enter**
3. You will see the following message:

```
User-agent: *
Disallow: /s3cr3t/
```

This means there is a hidden directory called **/s3cr3t/**.



Access the Hidden Directory

4. Now go to:

   http://natas3.natas.labs.overthewire.org/s3cr3t/

5. You will see a file named:

user.txt

6. Open the file

Inside this file, you will find the **password for the next level**.

```
natas4:QryZXc2e0zahULdHrtHxzyYkj59kUxLQ
```
